

# Do not burst crackers

## They are unsafe

This is the hand of an 11-year-old boy from our neighbourhood in Bangalore who is now scarred for life.

## The pollute

Delhi's PM2.5 measurements (air pollution) reached over 1200 this Diwali. This is over 100x the recommended average PM2.5 of 10.

## They are noise

Watch how animals react to crackers on Diwali and it is easy to see that the noise pollution bothers everyone.
