wtf do i know

Steven Deobald
Version 0.1
July 4, 2018

certainty is failure

"fuck charity"

$$\text{systems} \quad > \quad \text{statics}$$

E: bill gates (vs. Tim Berners-Lee)
A: nilenso is a system, nilenso
builds systems

if we are special, we shouldn't be

E: LLP agreement
A: publish **everything**

all systems are recursive, fractal

E:
inside–strings/particles/dna/cells,
outside–global political shift right
A: nilenso need not control
everything ; can we be a cell? a
virus? ; exploit our networks?
(give up on no one)

open [source] ...docs, source
material, designs, education,
policies, hardware, business
models...

E: internet, email, telephones,
capitalism, science – open always
wins
A: your fears are boring. –
anti-vaxxers, flat-earthers, and
climate change deniers

the future is actually pretty
obvious

E: the internet, tinier + integrated
devices: LIQUIDITY
A: if a good future is not obvious
to you, work on that − and how to
get there ...Starfleet?

ideals are a waste of time

E: sadhana forest
A: as in programming: "does XYZ
hurt? stop doing XYZ." – note: i
am not a free software idealist; it
has never hurt.

there is only one geography

E: this is self-evident. but: justin, sapiens, obvious globalization, etc. A: nothing to do here; just remember it. yay simple.org

the meaning of life is selfless
service

E: wat.
A: should i even include this.

fin.
